

# The “Son of Staples Center” is proposed for downtown Palm Springs.

## IT'S NOT GOOD.

An 11,000 seat sports and concert arena has been proposed for Palm Springs... bringing downtown L.A. sized crowds and shows that would crowd out virtually every other activity in central Palm Springs. The result: a major threat to public safety, emergency vehicle circulation and overall mobility... and a totally different Palm Springs experience.

We are not anti-arena. We have recommended a smaller venue that would have far fewer negative impacts on the Palm Springs we know and love. We appeal to the Tribe – who have been incredible stewards of the land – to work towards a more compatible project.

If the project moves forward as-is, we are likely to sue the City of Palm Springs to ensure adequate public safety, transportation and circulation mitigations to protect the people. (Fire and Police officials have said Palm Springs doesn't have the capacity to handle the arena.)

Please read our comment letter online, and let us know if you'd like to help. We will honor your privacy if you wish to participate anonymously. The arena as proposed would change Palm Springs forever, and not for the better.
